

SEVENTH MEETING OF THE PACIFIC METEOROLOGICAL COUNCIL (PMC-7)

AGENDA ITEM 22.1

One Pacific Programme

SPREP

"AT THE FRONTLINE OF WEATHER, CLIMATE, WATER, AND OCEAN ACTION IN THE PACIFIC"

Purpose of the Paper

1. Summarise the key design elements of the One Pacific Programme following the consultations with Pacific Met Directors and GCF NDAs in May 2024.
2. To provide an update with timelines on a revised concept note and the GCF process.

Design consultations to revise the Concept Note

with Met-Directors and GCF NDAs, May 2024

Regional Frameworks guiding the design of the One Pacific Programme

- Pacific Islands Meteorological Strategy 2017-2026
- GCF Climate Information & Early Warning Systems sector guide (2022)
- WRP Implementation Plan and Governance
- EW4ALL Executive Action Plan (2023-2027)
- 2050 Strategy Implementation Plan 2023-2030
- Framework for Resilience Development in the Pacific (FRDP)
- GCF Executive Director reference to OPP in the 2023 Forum Leaders meeting as an example of GCF presence in the Pacific

Core Principles of the design of OPP

- Country-focused (est. 88% of budget directly benefits countries)
- People-centered and inclusive codesign approach
- Innovative and transformative
- Building long-term sustainability mechanisms
- Interdisciplinary and multi-stakeholder approach
- Aligned to current key initiatives (e.g. WRP & EW4ALL)
- Integrated into current governance and investment structures
- Sufficient time for implementation (10 years: 18 months inception, 12 months closure phases)

Background

The programme will consist of four synergic components:

Component 1: Climate Information Services, modernisation of regional and national hydromet services

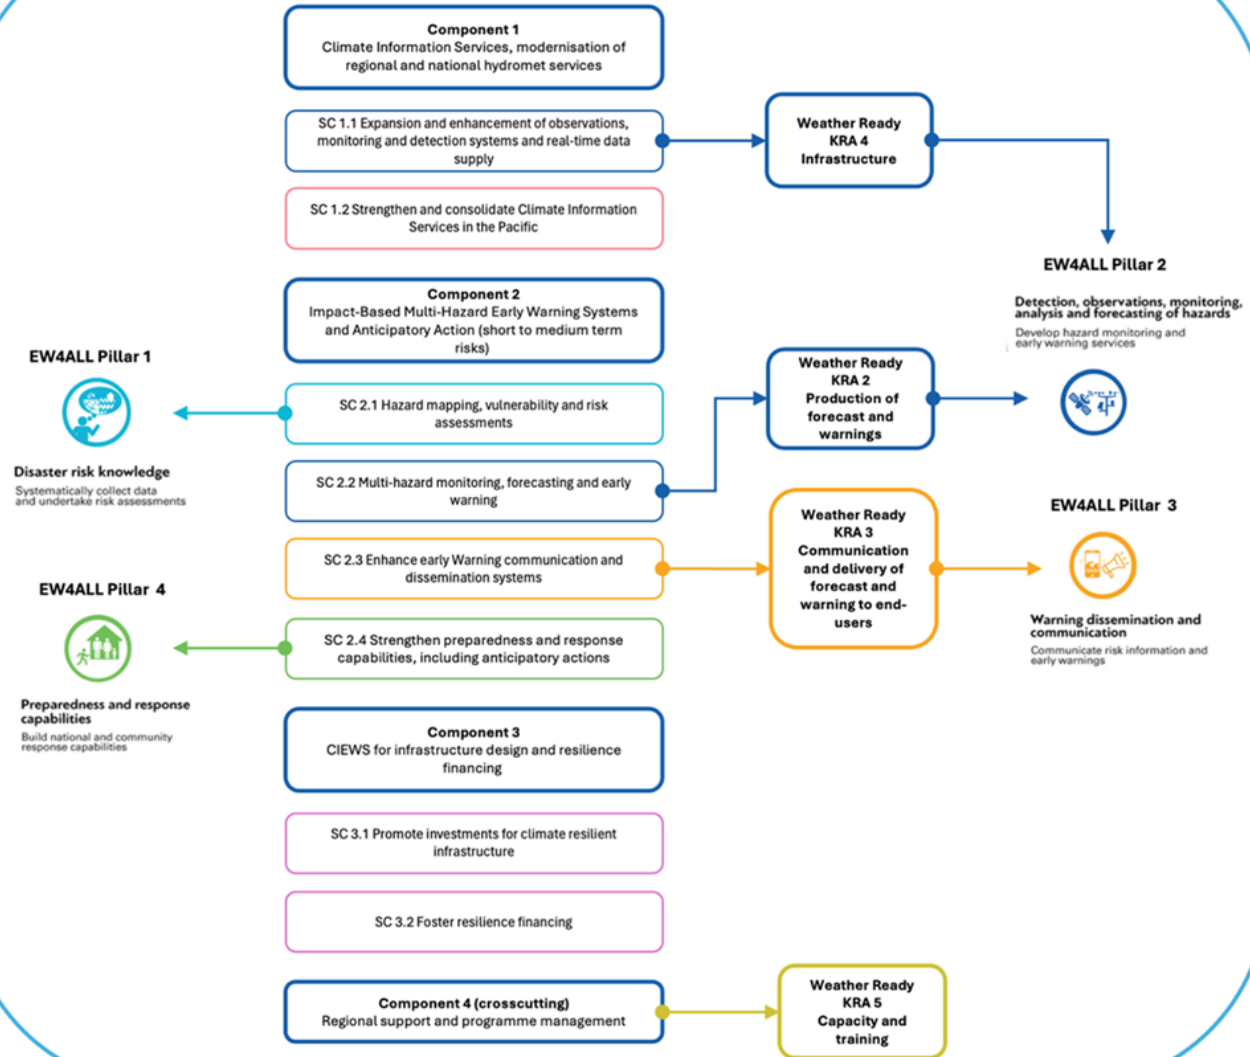

Component 2: Impact-Based Multi-Hazard Early Warning Systems and Anticipatory Action (short to medium term risks)

Component 3: CIEWS for infrastructure design and resilience financing

Component 4: Regional support and programme management

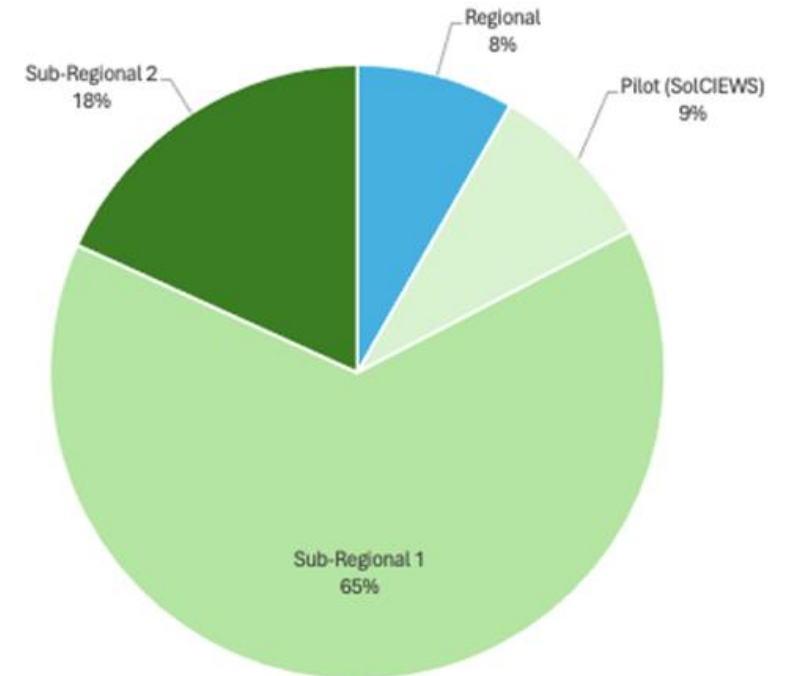

One Pacific Programme

Pilot (SolCIEWS)	%	Sub-Regional 1	%	Sub-Regional 2	%	Regional	%	Total
\$12,20	9%	\$86,30	64%	\$24,40	18%	\$11,10	8%	\$135,00

Repartition of activity budget

Timelines

Phase	Schedule	Activity	Milestone
Concept note development	May – September 2024	Finalization and submission of CN to GCF	
	June 2024	PPF NOL request sent to NDAs ¹	
	September 2024	Consultations at PMC	
	October 2024		CN approved by CIC2
	October 2024		PPF NOLs signed by all countries
	November-December 2024	Preparation of PPF support request	
Proposal Development	February 2025		PPF request approved
	March - August 2025	Feasibility studies, County, and regional level Consultations	
	June 2025	NOL request sent to NDAs	
	September 2025 – February 2026	Proposal drafting	
	December 2025		NOLs signed by all countries
	March 2026		Proposal submitted to GCF
Proposal review	March-September 2026	GCF and ITAP review and assessment	
Board Approval	October 2026	Submission and approval at B.46	Proposal Approved

Objectives

- The One Pacific Programme (OPP) objective is to consolidate and scale up the availability and use of Climate and Ocean Information Services and Impact Based Early Warning Systems in the PICs to enhance adaptive capacity, strengthen resilience, reduce vulnerability, and minimize losses and damages associated with the adverse effects of climate change and extreme weather.
- The OPP will have a duration of 10 years and will provide support to the 14 PICs member of the GCF, through regional and national level activities based on their specific needs and in synergy with other relevant initiatives.

Recommendations

The Meeting is invited to:

- Note the design details in ensuring that current regional arrangements are supported including the Weather Ready Pacific (WRP).
- Reaffirm support to the One Pacific Programme in that OPP will contribute in funding the WRP and support current regional arrangements led by the PMC.
- Recommend that the GCF NDAs (national designated authorities) assist through submission of no-objection-letters (NoL) for the Project Preparation Facility request to prepare the OPP proposal.
